

ENVIRONMENTAL POLICY

ALUCRAFT
REFLECTING EXCELLENCE

The Alucraft Group recognises that protection of the environment is the responsibility of all individuals and companies.

In accordance with the declared policy of shareholders Alucraft will minimize, as far as is reasonably practicable, the pollution of land, air and water. The board of Alucraft is committed to safeguarding the environment by setting the highest operating standards and techniques. Our aim is to minimise the effects on the environment of the company's manufacturing processes and associated operational activities.

The company will investigate and thereafter, participate in an open dialogue with suppliers, customers, employees and all stakeholders to implement its declared environmental objectives which seek to minimise usage of resources and wastage.

To implement this policy the company will:

- Keep abreast of and comply with relevant environmental legal requirements and emission standards.
- Review its activities to determine those which could have significant impact on the environment.
- Set objectives and targets for the progressive reduction of significant impacts.
- Provide necessary training and awareness to enable staff to understand and contribute to the implementation of the policy.
- Maintain a policy of continuous improvement of environmental management.

The board undertakes to support all best working practices to fulfil the requirements of waste management, the Environmental Protection Agency Act 1992, Protection of the Environment Act 2003 as well as relevant National and European regulations.

Jack McHugh
